This session is aimed at helping voluntary and community groups to fundraise for their organisation and the projects and activities they want to develop, with as little stress as possible. Groups will be able to confidently plan their fundraising effectively (we will give you a funding strategy template), sharing the burden and drawing on different skills and experience within the group. It will help you to assess your funding needs and identify a range of funding sources and fundraising methods (from grant funding to crowdfunding), and plan how to keep your fundraising on track.
